Care After Earlobe Repair

This page contains answers to frequently asked questions regarding your care after Earlobe Repair.

Appearance:

- You will have a vertical incision along each earlobe with surgical glue applied overtop. It may take 1 week before the glue falls off.
- After the glue falls off please apply lotion to the scar two times a day for 1 week.
- After 3 weeks you may begin massaging your incisions with lotion to help soften the scar tissue.
- You may have your ears pierced 3 months after your procedure.

Activity/Bathing/Sleeping:

- Please take it easy for one week after your procedure.
- You may allow water to run over your incisions, but do not scrub your incisions for 48 hours.
- Sleep on your back for 1 week after your procedure.

Medications:

- Though this is not an uncomfortable procedure, you may use Tylenol for any discomfort you may have after your procedure.

Post-Procedure Appointments:

- We will follow up 2-4 weeks after your procedure to ensure you are healing well.
